

## **IHRA Tech Department update for Stock and Super Stock Eliminator**

March 10, 2026:

### **Super Stock Eliminator**

- Ignition system will allow one coil per cylinder.
- Valve stem diameter is minimum of 11/32" unless equipped with smaller valves originally.
- Titanium valves **will not** be permitted in 2026 while IHRA evaluates their impact on the SS Class.
- Maximum bore size is .085 over OEM bore diameter

### **Stock Eliminator**

- Valve stem diameter is minimum of 11/32" unless equipped with smaller valves originally.
- Maximum bore size is .085 over OEM bore diameter.

Thank you,

IHRA Technical Department.
